

AJAY VISHWAKARMA

Computer Science (AI) Undergraduate | Aspiring Software Developer
Lucknow, Uttar Pradesh | +91-7905398965 | ajaykumar160380@gmail.com

[linkedin.com/in/ajay-vishwakarma-71649129a](https://www.linkedin.com/in/ajay-vishwakarma-71649129a) | github.com/ajay160380 | ajay-vishwakarmaa.netlify.app

PROFESSIONAL SUMMARY

Motivated Computer Science undergraduate specializing in Artificial Intelligence, with hands-on training and projects in Python, Data Science, Machine Learning, and REST APIs. Passionate about building scalable, AI-driven applications with optimized performance. Seeking a Software Developer role to contribute to a high-performing engineering team.

TECHNICAL SKILLS

Languages: Python (3+ yrs), Java

Frameworks & ML: Django, Flask, scikit-learn, NumPy, Pandas, Matplotlib

AI & Data Science: Generative AI, LLMs, Data Analysis, Predictive Modeling, REST APIs

Web & Databases: HTML5, CSS3, SQL, MySQL, Firebase

Tools & Cloud: Git, GitHub, VS Code, Render, Vercel, Google Cloud

EDUCATION & PROFESSIONAL TRAINING

Bachelor of Technology (B.Tech) – Computer Science and Engineering (AI)

Expected: May 2027

Babu Banarasi Das University, Lucknow, Uttar Pradesh

Relevant coursework: Data Structures, Artificial Intelligence, Machine Learning (90%+ score), DBMS, Python Programming.

Data Science with AI Training

2026

Grastech

Completed hands-on professional training focused on Data Science methodologies, exploratory data analysis, machine learning algorithms, and AI model deployment pipelines.

PROJECTS

Machine Learning Models – House Price & Brain Tumor Prediction

2026

Python | Machine Learning | scikit-learn | Pandas | OpenCV

- Engineered a House Price Prediction regression model processing over 1,000+ housing records across 12+ multi-variable features using scikit-learn and Pandas.
- Developed an automated Brain Tumor Detection system leveraging OpenCV and classification algorithms to process MRI image features with 92%+ model test accuracy.

EdTech AI – YouTube Playlist Analyzer and Tutor

2025

Python | Django | YouTube Data API | Groq API | Prompt Engineering

- Built an AI-powered educational web application handling multi-video playlist parsing (up to 50+ videos per session) for automated study note generation via Groq API.
- Integrated YouTube Data API for transcript extraction and streaming data retrieval, achieving sub-2-second response latency for student queries.

Healthcare Management Dashboard

2026

Python | Django | AI Assistant | Map Integration

- Designed a centralized healthcare platform using Django managing 3 core user modules (Patients, Doctors, Administrators) and relational database schemas.
- Integrated an interactive AI assistant and map routing component to support quick facility location and handle 10+ distinct appointment workflows.

My Digital Twin – Habit Prediction App

2026

Python | Django | HTML5 | CSS3

- Developed a full-stack behavioral tracking web application using Django backend models to process 5+ daily habit parameters and generate predictive insights.

CERTIFICATIONS

Microsoft Azure AI Essentials Professional Certificate • AI and Cybersecurity Awareness (TCS iON) • Technology Software Development Job Simulation (Forage) • Globally Responsible Engineering (Forage) • Data Analytics Job Simulation (Deloitte, Forage)

ACHIEVEMENTS & SOFT SKILLS

Achievements: Presented Smart Women Safety Device (IoT project featuring 3+ hardware sensors) at BBD University Tech Expo 2026.

Soft Skills: Team Collaboration, Time Management, Technical Curiosity, Adaptability, Problem Solving.
