Career Objective :

To work as a Software Developer in a growth-oriented organization where I can utilize my coding skills, problem-solving abilities, and technical knowledge to develop efficient and scalable solutions.

Technical Skills:

- Basic Data Structures & Algorithms
- Python programming, Django Framework
- NumPy, Pandas, matplotlib
- SQL, REST APIs (Groq API, YouTube Data API)
- Web Technologies (HTML/CSS)

Education

- Bachelor of Technology (B.Tech) in Computer Science & Engineering (Artificial Intelligence)
- Babu Banarasi Das University, Lucknow [2027]

Projects

Project 1: EdTech AI - YouTube Playlist Analyzer & Tutor

- **Description:** Developed an AI educational platform that generates instant study notes and summaries from YouTube playlists. It features an ad-free video player and a dedicated "Focus Room" with relaxation music for distraction-free studying.
- **Technologies:** Python, Django, YouTube Data API, Groq API, Prompt Engineering.

- **Key Progress:** Integrated YouTube API for transcript extraction & ad-free streaming, and utilized Groq API for fast natural language processing to resolve student queries instantly.

Project 2: My Digital Twin Web Application

- **Description:** Built a web application that acts as a digital twin, capable of predicting user habits based on various provided scenarios.
- **Technologies:** Python, Django, HTML/CSS.
- **Role & Contributions:** Designed the frontend interface and developed the backend logic to process scenarios and generate accurate habit predictions.

Project 3: Personal Finance Tracker

- **Description:** Developed a finance tracking tool to help users manage daily expenses, track income, and visualize financial data for better money management.
- **Technologies:** Python, Pandas, Matplotlib.
- **Key Progress:** Implemented data structures to store transaction history and utilized visualization libraries to create insightful expense reports.

Internship

- N/A

Certifications

- Python Fundamentals for Beginners
- ChatGPT for Beginners
- Generative Artificial Intelligence
- Artificial Intelligence Fundamentals
- Road Safety Pledge Certification (Value Life Foundation & Suzuki)

Achievements:

- Completed online certifications in Computer Science domain.
- Actively participated in the BBD University Tech Expo 2026.

Softskills:

- Team Collaboration

- Time Management
- Technical Curiosity
- Adaptability

Personal Details

- Date of Birth: 06/11/2006
